ANIMAL ALLIANCE PRICE LIST as of MARCH 4, 2024

Spay and Neuter Services

Dogs		Cats	
Weight	Price	Type	Price
0-39 pounds	\$250		
40-59 pounds	\$300	Female	\$195
60-79 pounds	\$350	Male	\$170
80-99 pounds	\$400	Feral Special*	\$95
100+ pounds	\$550		

* This “Good Samaritan” rate is reserved for those caring for outdoor/wild/feral cats. Includes spay or neuter surgery, rabies and FVRCP vaccines and ear tip. Cat must be feral AND COME TO THE CLINIC IN A FERAL CAT TRAP (not a carrier) to qualify for this price.

Pyometra (infected uterus) is a medical emergency and the need for spay surgery is urgent, call for pricing and appointment, do not wait!

Additional Charges for Spay/Neuter Services

- **Brachycephalic Dogs** (flat face) + \$50 for additional monitoring due to complexity of breathing system.
 Examples of these breeds are: Shih-Tzu, Boston Terrier, Boxer, Lhasa Also, Pug, French Bulldog, Cavalier King Charles Spaniel, Boston Terrier, Pekingese. Some mixed breeds also have this characteristic and will be charged. Click [here](#) for more information on health and breathing problems that can be encountered by these dogs: We do *not* provide surgery for English Bulldogs due to their extreme brachycephalic skulls.
- **Pregnancy:** +\$50. Pregnancies are humanely terminated during spay procedures. It is unlikely that we will know if animal is in early stages of pregnancy. Once surgery is underway, there is nothing that can be done to change course.
- **In Heat:** +\$50. You would likely know in advance if your animal is in heat due to bloody discharge.
- **Undescended Testicle Charges:** (Dog +\$75 per testicle; Cat +50 per testicle) Surgeon must cut abdomen and find testicle(s). This is not a common condition and you would know in advance if your animal had only one visible testicle. Both retained testicles is very rare.
- **Shavedown for Matted Long Hair Dog:** +\$30
